

IN THE SPECIFICATION

Please replace the paragraph on page 3, lines 12-18 with:

B-1
An alternative technique is to use an array of light emitting devices (LEDs) as the source of light in projection display systems. The use of an LED light source substantially eliminates the mechanical, optical, and electrical rotational timing errors that are intrinsic to color wheel systems, and is described in a commonly assigned co-pending patent application Ser. No. 09/823,448 09/507,260, by Fred Parker et al. and entitled "System and Method Employing LED Light Sources for a Projection Display," the subject matter of which is herein incorporated by reference.
